A guide to quantifying membrane protein dynamics
INFORMATION FOR AUTHORS

AIMS AND SCOPE

The FEBS Journal is an international peer-reviewed Journal devoted to publication of high-quality papers reporting significant advances in the molecular life sciences. Acceptance decisions are based on the originality and quality of the research and its prospective interest to a wide readership. Papers submitted to The FEBS Journal should provide novel perspectives on a biologically relevant problem and be of interest to a broad readership.

The scope of the Journal is broad and inclusive. We are particularly interested in papers in which state-of-the-art approaches are applied to bring novel insight into molecular and cellular mechanisms that underlie the functions of molecules, cells and organisms. The Journal also welcomes manuscripts of an interdisciplinary nature, including systems approaches that address fundamental concepts in molecular, cellular or organismal biology.

The Journal does not accept papers that lack biological insight. Papers describing bioinformatic analysis, modelling or structural studies of specific systems or molecules should include experimental data.

The FEBS Journal also publishes Reviews, Minireviews, Viewpoints and Snapshots on a wide range of topics. These pieces are specially commissioned by our Editorial team and are selected on the basis of their interest to a wide readership. In addition, the Journal publishes Special Issues that provide detailed insight into a specific scientific field.

The areas of interest of The FEBS Journal include, but are not limited to:

- Biochemistry
- Bioinformatics and Computational Biology
- Developmental Biology
- Enzymology and Chemical Biology
- Evolutionary Biology
- Genomics
- Immunology
- Molecular and Cell Biology
- Molecular Mechanisms in Health and Disease
- Molecular Microbiology
- Molecular Neurobiology
- Pathogens and Infection
- Proteomics
- Signal Transduction
- Stem Cells
- Structural Biology
- Systems Biology and Synthetic Biology

SUBMISSION OF MANUSCRIPTS

The FEBS Journal requires authors to submit manuscripts online at http://mc.manuscriptcentral.com/febsj. All submissions should be accompanied by the names and contact details of four preferred referees (non-preferred referees can also be indicated during submission).

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a lecture, review or thesis); that it is not under consideration for publication elsewhere; that its publication in the present form has been approved by all authors and by the responsible authorities in the institutions where the work was carried out; and that, if accepted, it will not be published elsewhere in the same form, in any language, without the consent of FEBS, the exclusive licence holder.

Any conflict of interest must be stated on the title page of the manuscript.

Submission of a research article is taken to imply that the authors are willing to make available to academic researchers cell lines, DNA clones, antibodies or similar materials, that have been used in the experiments reported.

Complete information on the preparation of manuscripts for submission to the Journal can be obtained from the Journal homepage (http://www.febsjournal.org) or from the Editorial Office. Failure to adhere to these instructions may delay editorial processing of the manuscript.

EVALUATION OF MANUSCRIPTS

Each manuscript submitted is assigned to one of the Editors of the Journal who is responsible for its evaluation. The Editor’s decision regarding publication is based on the reports of referees, which will, at the Editor’s discretion, be transmitted to the authors. Authors will be informed of the editorial decision normally within 4 weeks following submission of a manuscript.

Enquiries should be addressed to:

Editorial Office, The FEBS Journal, 98 Regent Street, Cambridge CB2 1DP, UK
Tel: +44 1223 369020
Email: febsj@febs.org
Web address: http://www.febsjournal.org

Authors wishing to submit a review article or suggest a minireview series should contact the Reviews Editor at febsj@febs.org.
